Topic: Frequencies: The Universal Healer

“Future medicine will be the medicine of frequencies.”

Albert Einstein

In the realm of quantum physics, everything in the universe vibrates at a signature frequency. Dysfunction occurs when the frequencies of cells, organs, and tissues deviate from their factory default settings. The primary factors that alter these vibrational frequencies are: chemical toxins, heavy metals, electromagnetic frequencies (EMFs), infections, intestinal parasites, poor quality of food, air, and water, and distress to name a few. In reality, illness appears when the body's terrain becomes polluted. This in turn causes inflammation which then causes fibrosis or scarring. The end result is organ failure, disease and death. The key to reversing this scenario is to raise the vibrational frequencies of the body. This can easily be accomplished through the use of organic foods, structured water, essential oils, sunshine, prayer, meditation, color therapy, acupuncture, food based supplements, and scalar energy. By raising the vibrational

frequencies of the body, “disease” disappears. Someone once said that the closer one gets to the truth, the more simplistic the solution.

Since 1997, I have clinically observed these truths and written two books, *Remove the “Splinters” and Watch the Body Heal* and *Cancer Deconstructed*. Both books present actual case studies of cancers, autoimmune diseases, heart diseases and much more that have resolved using the principles of quantum physics. I invite you to take the road less travelled and open your eyes to a whole new horizon in healing.

In 1997, my wife was diagnosed with breast cancer. She opted for a lumpectomy; the pathology report stated that they missed a margin. A second surgery was scheduled for two months out. During the two months my wife treated herself with Rife frequencies. The pathology report from the second surgery stated that there were NO cancer cells. Remove the “splinters” and watch the body heal.

A second instance resulted from a patient who also was diagnosed with breast cancer. The patient was requested to have all her mercury fillings removed by a qualified dentist. Dietary changes, supplements, and Rife frequencies were used. Unfortunately the patient panicked and had the breast removed. The pathology report stated that there was NO cancer in the tissues.

These two events convinced me that frequencies were valid and must be a part of any natural treatment approach.

In 2015, I purchased a Theraphi system, which utilized scalar energy as the primary healing mechanism. This system combined the scalar waves with 18 healing frequencies. Much of the research was done by Russians. The Russian research revealed that scalar waves had three primary affects:

1. They repaired the DNA
2. They neutralized the frequencies of heavy metals, chemicals, pathogens, and other abnormalities. In essence. it was electronic alchemy.
3. They stimulated stem cells for repair.

In the 1960s, Antoine Priori, an Italian researcher, with a 16 million dollar grant from the French government, working in France discovered that scalar energy cured almost 100% of all cancers. The French universities would not accept his finding because he could not explain the mechanism. My personal clinical experience with the scalar energy system has been incredible. A female patient with metastatic breast cancer was given two weeks to live. She was treated with the same system that I had. Daily 20 minute treatments for four weeks resulted in total resolution of her metastatic cancer. Other dramatic outcomes involved a patient from Brazil who had severe painful ulcerations in her throat, totally resolved in 22 minutes. A female patient with whiplash pain symptoms disappeared in a five minute treatment. A Westi who had PTS totally resolved in 12 treatments.

Another milestone in my practice occurred with the acquisition of the CyberScan System. This system also used scalar energy to assess and treat patients. This system enabled me to clone supplements. My major breakthrough came by combining the two technologies that enabled me to produce the Tesla Energy Card. This technology permitted the imprinting of healing frequencies into water and when worn to transfer the healing frequencies into the body.

Three weeks ago I had an epiphany of how to transfer the healing frequencies and make them available to people anywhere in the world. I literally drove to my office on a Saturday morning and experimented with

my concept. Later that evening I tried my concept with my lady friend and it worked. Since then I have tested many patients and it worked every time. The following video demonstrates its effectiveness.
