

Secrets The Medical Establishment Does Not Want You to Know

Dr. Smith **Live** **50th Episode**

Topics:

You Will Learn:

- *Damage caused by the booster shots*
- *What the COVID Autopsy reports are revealing*
- *How to combat the cytokine storms created by the jab*
- *Why the AMA, Big Pharma, and the FDA squashed Frequency Technology*
- *The real causes of cancer, heart disease, chronic fatigue, and more...*
- *DIY natural healing modalities and treatments you can do at home*

“It is health that is the real wealth, and not pieces of gold and silver.”
– Mahatma Gandhi

Topics: **Secrets The Medical Establishment
Does Not Want You to Know**

When: Thursday, October 28, 2021

Where: Zoom Meeting

<https://us06web.zoom.us/j/82340951077?>

[pwd=ckhIZVArRzBZM0VQVGhEdjJhSkFpdz09](https://us06web.zoom.us/j/82340951077?pwd=ckhIZVArRzBZM0VQVGhEdjJhSkFpdz09)

Time: 8:00 pm

COVID-19 Autopsies Uncover Ways The Coronavirus Kills

Pre-existing conditions that set patients up for COVID death:

overweight and obesity, arterial hypertension, asthma, and obstructive sleep apnea, immune dysregulation, and liver damage as well as graft-versus-host disease (it's a syndrome, characterized by inflammation in different organs; commonly associated with stem cell transplants.) following cancer and bone marrow transplantation. Furthermore, clinical histories and autopsy results revealed a disproportionately high prevalence of thromboembolism and ischemic organ damage patients.

Autopsy Reports

- The lung is the most affected organ in gross examination.
- The coronavirus infiltrates deep into the lungs and causes a cytokine storm.
- The infection causes swelling, and fluid and debris can start to fill the lungs.
- The damage from the virus can spread to other organs: heart, liver, brain, and kidneys.
- A small autopsy study shed new light on cardiac histopathology in COVID-19 patients, showing high rates of macrophage infiltration in cardiac tissue. Macrophages are like little pacemen that gobble up foreign material, viruses, bacteria, etc.
- Blood clots 'in almost every organ': "The clotting was not only in the large vessels but also in the smaller vessels. Dr. Richard Vander Heide said he found hundreds or thousands of microclots in the lungs of a 44-year-old man who had been treated at LSU Health.
- Dr. Rapkiewicz found the presence of rare cells called megakaryocytes in the hearts. These cells produce platelets used to control clotting and are usually only found in the bone marrow and lungs.
- In June, other research from France found that 84% of Covid-19 patients in intensive care had neurological symptoms.

- Researchers also found the virus in parts of the brain, kidneys, liver, gastrointestinal tract and spleen and in the endothelial cells that line blood vessels, as some had previously suspected. Researchers also found widespread clotting in many organs.
- Dr. Solomon noticed a lot of brain damage as a result of oxygen deprivation —no matter if the patient examined was a longtime ICU patient or a person who died very suddenly of Covid-19.
- Dr. Villani and her colleagues conducted autopsies on 17 people:
 - a. Destruction of a cell type called AT1, which are important cells that enable you to breathe and exchange oxygen and carbon dioxide. These cells were infected and dying.
 - b. The damage from the virus is outpacing the lung's ability to heal itself, leading to lung failure. The lungs have another type of cell called AT2. They can convert themselves into AT1 cells to replenish cells that might die naturally or due to damage. But in COVID-19, this process is stopped midway. In a last attempt to repair the lung, turns to another cell type in the lung called progenitor cells. These are like stem cells and serve as an emergency reserve to help repair damage in the lung.
 - c. Some patients sustained significant heart damage, but we didn't find any viral RNA in the heart.

Note: This study revealed that 8 wt% of graphene-fibres showed good antibacterial effects owing to the direct contact between bacterial cells and the sharp edges of the graphene nanostructures. This **direct contact is also responsible for severe membrane deformation and the efflux of cytoplasmic material** [Investigation into the toxic effects of graphene nanopores on lung cancer cells and biological tissues].

The spike protein of SARS-CoV-2 variant A.30 is heavily mutated and evades vaccine-induced antibodies with high efficiency

[Cellular & Molecular Immunology](#) (2021) | [Cite this article](#)

Early postmortem mapping of SARS-CoV-2 RNA in patients with COVID-19 and the correlation with tissue damage

Very high viral loads were detected in most patients' lungs, and the **presence of intact viral particles in the lung tissue** could be verified by transmission electron microscopy. Interestingly, **viral RNA was detected throughout various extrapulmonary tissues and organs without visible tissue damage**. The dissemination of SARS-CoV-2-RNA throughout the body supports the hypothesis that there is a maladaptive host response with viremia and multiorgan dysfunction.

My own clinical experiences with sheading among non-vaccinated patients:

- One patient had the vaccine adjuvant Tromethamine in his liver.
- One patient had the J & J vaccine trapped in her eyes (she had dry eyes).

My own clinical experiences with vaccinated patients:

- One patient who had the J & J vaccine had it trapped in her left shoulder where she had constant pain. She also had shingles in the same area and a red rash was present. It was the left arm where she received the inoculation.

“Vaccine” Booster Damage

1. COVID-19 vaccine manufactured by Johnson & Johnson (J&J) can lead to an increased risk of a rare neurological condition known as Guillain-Barré syndrome, which occurs when the immune system damages nerve cells, causing muscle weakness and occasional paralysis.
2. Nearly 1 in 4 patients with COVID-19 from the Mount Sinai Health System registry experienced a cognitive-related issue, with hospitalized individuals shown to be more likely to have brain fog after infection. Overall, 23% of patients reported issues with memory recall, 18% showed deficits in their cognitive processing speed, and 15% had deficits in phonemic fluency in their speaking.

We performed full body autopsies on 26 patients that had died after SARS-CoV-2 infection and COVID-19 at the Charité University Hospital Berlin, Germany, or at associated teaching hospitals.

We found that septic shock and multi organ failure was the most common immediate cause of death, often due to suppurative pulmonary infection. Respiratory failure due to diffuse alveolar damage presented as immediate cause of death in fewer cases. Several comorbidities, such as hypertension, ischemic heart disease, and obesity were present in the vast majority of patients.

Vermont Department of Health: Six COVID deaths since Friday, booster shots begin (Sept. 3, 2021). 310 deaths statewide. Cases among children 5-14 continue to grow, as cases among the general Vermont population have declined. When a healthy person wears a mask, it depresses their immune system.

What are vaccine boosters?

Vaccine boosters are additional vaccine doses that should provide extra protection against disease, as the effects of some vaccines may wear off over time.

- The boosters lower your immune system.
- Unidentified fibers in the boosters (graphene oxide); the mfg are imbedding them in polymers and metals.
- The liver is taking massive damage after the boosters.
- The vaccine boosters are hitting your organs and lymphatic system.
- The number of active COVID cases goes through the roof after inoculation because it lowers the immune system. First shot 15%; second 35%; the third will do you in when exposed to another virus.
- There is not enough data at this time to make definitive statements; however, judging from the results of the initial vaccines I would not put too much faith in the effectiveness of the boosters.

September 25, 2021: Norway lifts coronavirus restrictions after 561 days. The Nordic nation joins a small but growing number of countries, including Denmark and Britain, which have removed all domestic restrictions limiting the spread of the coronavirus.

Medical Establishment Propaganda and Character Assassination:

- America's Frontline Doctors: Right wing, anti-science political group
- 'America's Frontline Doctors' Peddle Bogus COVID-19 Treatment

- America's Frontline Doctors (AFLDS) is an American conservative political organization. Affiliated with Tea Party Patriots co-founder Jenny Beth Martin
- America's Frontline Doctors, a group with right-wing ties, has been promoting fake COVID-19 treatments.
- 'America's Frontline Doctors' Continue to Misinform on COVID
- Canada Starts Cracking Down on Fringe Medical Groups -
- America's Frontline Doctors (AFLDS), known for spreading their unscientific rhetoric attacking both treatments for Covid and questioning the efficacy of Covid vaccines. Their unproven 'Covid treatments', focusing on Hydroxychloroquine, Ivermectin, and other drugs have undoubtedly led to people dying from Covid.
- Who is American FrontLine Doctors: they can only be described as quacks; the group rose to prominence in mid-2020, feeding off the fear of the Covid pandemic to “sell” their Covid treatments to trusting and unsuspecting members of the public.
- Their founder, Dr. Simone Gold, who is currently under investigation for her role in the January 6 insurrection in the Capitol, where she was captured on film, is outspoken and controversial. She frequents popular conspiracy channels and has been instrumental in spreading false and misleading information about Covid vaccines.

How to combat the cytokine storm created by the jab or COVID

- ***Hydroxychloroquine:*** one tab daily if infected with COVID
- ***Ivermectin:*** 1cc per 100 pounds once a day if infected with COVID
- ***Zinc:*** 60 mg per day
- ***D₃:*** 5,000 to 10,000 units a day
- ***Vitamin C (food based - Indian Goose Berry):*** 3,000 mg per day
- ***Quercetin:*** 3,000 mg per day
- ***Glutathione:*** 500 mg per day

- **Curcumin:** 1200 mg per day
- **Resveratrol:** 400 mg (two tsp per day) per day

Why the AMA, Big Pharma, and the FDA squashed Frequency Technology

- Because frequencies are too effective
- They are inexpensive
- Because it reduces their revenue stream
- If too many doctors and patients would use them, it could put them out of business.

The real causes of cancer, heart disease, chronic fatigue, and more...

- The real causes of **cancer** are low oxygen and toxicity:
 - Adulterated oils corrupt the cell membranes turning them into plastic which lowers the cell's oxygen level.
 - Chemtrails, polluted water, foods, fertilizers, detergents, drugs, vaccines, degassing vapors from paint, rugs, and plastic furnishings.
- **Heart disease** is a disease of malnutrition and toxicity: 85% of clogged coronary arteries are caused by adulterated oils (corn, cotton seed, safflower, sunflower, soy, canola); organic, cold pressed sunflower oil will dissolve the plaque in the arteries. Protomorphagens (deshiccated bovine heart) provides the genetic blue print to repair the heart muscle; In addition, organic foods will help repair the heart and keep the blood not sticky.
- **Chronic fatigue:** Invariably is caused by a weak thyroid, weak adrenals and usually due to a virus like EBV (Epstein Barr) or CMV (cytomegalovirus). Other issues to focus on are: heavy metals,

glyphosate, vaccines and their adjuvants, chemicals, and other pathogens like mold, fungi, that become trapped in the organs.

- **Vertigo:** Could be caused by cranial distortions of the temporal bones, atlas or first cervical vertebra subluxation or fixation, weak sacroiliac joint, virus in the middle ear (CMV), toxins from root canal teeth and toxicity from parasites.

- **Aortic aneurysm:** Nutritional deficiencies (vitamin C, A, and E, and collagen) and hypothyroidism (causes weak muscles and ligaments).

- **Anxiety, depression and panic attacks:** Hypothyroidism and nutritional deficiencies B-complex, minerals, heavy metals, viruses, mold and fungi.

- **Attention deficit hyperactivity disorder (ADHD):** Combination of glyphosate, Hypothyroidism, thimerosal in the brain and thyroid and vaccine contamination and heavy metals (mercury, aluminum).

- **Acne:** Fluoride (toothpaste, water), bowel toxicity, parasites, processed foods.

- **Headaches: Migraines** most often due to cranial distortions; tension headaches most often due to malocclusions, upper cervical subluxations (misalignment of the vertebrae), SI joint (sacroiliac) B-complex vitamins, possible food allergies. **Cluster headaches:** usually liver toxicity.

- **Seizures:** Toxicity of the brain, cranial distortions, malocclusion causing cranial distortions, heavy metals (thimerosal or aluminum), infections like meningococcal, CMV or EBV.

DIY natural healing modalities and treatments you can do at home

- Rife Generator
- Ozone unit
- PMT (pulsed magnetic therapy)
- Microcurrents
- Bioptron full spectrum light
- Frequencies available from the Frequency Shop

- Beemer
- Infrared laser
- Simple laser pointer (red: 650 nm, 632.8 nm, or green 532 nm)
- Essential oils
- Color therapy
- Reflexology
- Infrared Sauna
- Acupressure
- Yoga
- Raw juicing
- Walking on pea gravel
- Rebounder
