

## Origin and Use of Frequencies:

Because cells and organs are electrical in nature, there are many biological interactions that occur at the cellular level when the body becomes surrounded in a plasma field of scale energy or an electromagnetic field emanating from a frequency device. It is known that when an instrument is producing any frequency, the body takes on an electrostatic charge. This process raises the electrical voltage of the cells, which excites the cells in the body and enables them to communicate with each other more effectively. This enhanced communication in turn, assists the body in establishing homeostasis. Frequency devices are tools that support the body in its repair process.

When evaluating the body, one must look globally and ask five major questions:

1. How polluted is the body overall?
2. How polluted is the GI tract where 60% to 80% of the body's immune system is located?
3. How do we repair the system with organic whole foods and food based nutrients?
4. Where does treatment with frequencies fit into the healing equation?
5. Is hypoxia a major factor in the patient's disease process and what is its cause?

If your first few questions focus on just trying to find the "right" frequency to cure the patient, you are going in the wrong direction.

- Killing the villain, pathogens, without correcting the terrain is not solving the problem.
- Giving a COVID-19 vaccine without strengthening the immune system is dangerous.
- Treating symptoms without a definitive diagnosis is a dangerous approach to healing.

"Without a proper diagnosis there is NO treatment."

The following overview is being presented to give you a better understanding of frequencies and how they relate to the universe, your body, and mouth.

### History

The research done by such geniuses as Antoine Priore, Thomas Galen Hieronymus, Nikola Tesla, Royal Raymond Rife, Georges Lakosky, Nikolai A. Kozyrev, and Thomas Henry Moray provide the blue print for "The Cycle

of Life.” Since the closer one gets to the truth, the more simplistic the solution becomes. The following overview is my illusion of the Cycle of Life.

According to Nikolai Kozyrev, the sun produces scalar energy. The research of Thomas Hieronymus proved that scalar energy is the key component for stimulating photosynthesis. He proved his theory in 1940 by growing plants in total darkness just by exposing them to scalar energy. Fritz Albert Popp, a German researcher documented that plants store energy in the form of biophotons. **Supplements made from a food source have biophotons** whereas **synthetic vitamins** do not. Kozyrev showed that scalar energy is a spiraling energy that was the primal force of the universe as well as of all creation. Its waveform is a double-helical configuration the same as DNA. In essence, scalar energy provides the template for correcting DNA mutations. When scalar energy is properly influenced, it can be caused to coalesce to the point where material units such as electrons, protons, and neutrons are formed. This transmutation is essential for creating matter and the healing process. It is also the reason why each entity has its own unique signature frequency. Also of importance is the fact that scalar energy has the ability to disassemble viruses, bacteria, heavy metals, chemicals and in reality functions as the janitorial service of the body. In response to the breakdown of these toxins, the body carries the debris away via the lymphatic and filtering lymph node system which transports the macrophages, polymorphonucleocytes, and other defensive cell types.

Scalar energy can piggyback healing frequencies and imprint them into water, or bodily fluids both of which act as crystals. This is how our memory system works. Your memory is held in the tissues and fluid of

the body. This is borne out when heart transplant patients receive someone else's heart but they also take on the characteristics of the donor, which reveals itself in newly acquired cravings like beer or other foods which they previously never liked.

Connecting the dots makes it possible to now see The Cycle of Life. The sun produces the scalar energy. The plants store the scalar energy in the form of biophotons, which are then eaten by humans and animals. The scalar energy is used to repair the body and also acts as the transporter system. In addition, since the body is made up of ninety percent fluid this fluid then becomes the antenna of the body to pull in ambient scalar energy from the environment. Unfortunately EMFs (wi-fi, cell phone frequencies, TATRA emergency broadband frequencies, etc.), insecticides, pesticides and herbicides, heavy metals, viruses, dental implants, mercury fillings, gold crowns and other pathogens act to disrupt our antenna diminishing our ability to absorb scalar energy and reduce our body's capacity to heal. It should also be noted that metals in the mouth (braces, metal bridgework, and implants) act as antenna pulling in EMF signals, which will dehydrate the body and cause systemic inflammation.

Our magnificent functioning body is connected to the universe and all other living beings by means of quantum entanglement. Quantum entanglement's basis is scalar energy, which travels multiple times faster than the speed of light. This is the definition of instantaneous. Because the same thought can be present in two people at the same time. In a nut shell we are all connected. Our thoughts are in the form of scalar energy. This is why we can send healing affirmations (scalar waves) instantaneously to anyone in the world no matter where they are located. It is also the reason why one must be careful for what they wish

for. What you put out there in the form of positive or negative thoughts will come back to you.

***Less is more. Antoine Priore's Plasma tube (scalar energy) has three big attributes:***

1. It corrects the mutated DNA of cancer cells and reprograms them.

**Note:** All carcinogens (Hg, benzene, glyphosate, etc.) block the absorption of 280 nm wavelength of light; 280 nm ( $9.3398 \times 10^{-16}$  Hz) is the frequency required to heal the body.

2. It disassembles viruses, bacteria, mold, fungi, heavy metals, chemicals and any other toxin.

3. It stimulates stem cells for healing.

I routinely use the Theraphi System in my practice. It produces a plasma field of scalar energy with 18 healing frequencies piggybacked on the scalar wave.

## Scalar Instrument reprogrammed the mutated DNA

In practice, Antoine Priore utilized a powerful and accurate scalar energy instrument that effectively reprogrammed the mutated DNA in both humans and animals alike, and subsequently cured all types of cancer. Cancer is an informational disease in which a gene is mutated resulting in the uncontrolled proliferation of cells. In specific, Priore's scalar energy plasma tube successfully cured this informational disease by reprogramming the DNA molecule, thereby correcting the substitution, addition or deletion of the base pairs in the mutated genes. Once the base pairs have been corrected and are in the proper sequence, cancer is cured.

*Antoine Priore's Scalar Energy Plasma Tube*

Frequency technology not only targets microorganisms and regulates the immune system, but it also aims to drastically reduce pain, harmonize the body, repair tissue, speed up post-surgery recovery, and boost the healing of fractured bones. Frequency devices typically have a calming effect on hyperactivity and high stress loads. It is often

used by many during meditation. The effects of Pulsed Electromagnetic Fields (PEMF) on the cellular level are numerous, and include promoting detoxification, enhancing nerve repair, improving circulation, plus easing both depression and insomnia. Ultimately, the immune system becomes healthier, the nervous system relaxes, and bones and joints become stronger.

The key to successful use of frequencies is to prepare the body to handle the massive die off created by the destruction of pathogens and toxins. Another key factor is to supply the body raw materials to assist normal function and repair cells.

Since the liver is the body's primary filter, it behooves the practitioner to first detox this organ and provide it with the essential nutrients required for detox. This will reduce or eliminate herxheimer reactions. Key components that the liver needs to detox are:

1. **Glutathione:** considered the master antioxidant; alleviates oxidative stress.
2. **SOD (Super Oxide Dismutase):** a group of enzymes that catalyze the dismutation of superoxide radicals ( $O_2^-$ ) to molecular oxygen ( $O_2$ ) and hydrogen peroxide ( $H_2O_2$ ), providing cellular defense against reactive oxygen species.
3. **Curcumin:** it shortens the telomeres of cancer cells and lengthens those of healthy cells.
4. **B-complex vitamins:** assists in the breakdown and removal of toxins.

Also one MUST test the energy pattern of all supplements with the energy pattern of the patient. Just shotgunning a standard protocol is a crap shoot.

In addition to using the supplements to detox, one should also use specific frequencies to detox the liver, kidneys, intestinal complex, and stimulate the lymph system to expedite removal of spewed toxins. All toxins from the mouth filter through the lymphatics to the thyroid; when the thyroid function is depressed, it directly affects the metabolism of every cell of the body. Functional generator units provide manuals which give the appropriate frequency programs for specific needs.

Also of primary importance is to rebuild the cell membranes. Why? Because most people's cell membranes have the chemical composition of plastic caused by the adulterated omega 6 oils (safflower, sunflower, sesame, walnut, corn, soy, and pumpkin

seed) in their diet. It is the omega 6 oil's primary function to increase cell membrane permeability allowing toxins to pass out and nutrients and oxygen to move inside the cell. If the cell membranes are NOT repaired, any long term success is fantasy.

There are other issues that must be addressed but because of time constraints I will be unable to cover these areas. For those interested in learning more, you can download my new book, *Remove the "Splinters" and Watch the Body Heal* ([icnr.com](http://icnr.com)) and purchase it on Amazon. Also on [icnr.com](http://icnr.com) under **Case Studies** are over 200 cases, which cover a broad range of medical illnesses that defied conventional medicine.

There are key frequency programs that I strongly recommend:

1. Osteomyelitis: especially good for patients with dental problems, RC, infections.
2. Restoration of neurotransmitters: sweep from 90 Hz to 111Hz.
3. Recalibrate the body's energy: 7.83 Hz - Schumann frequency.
4. Raise one's overall frequencies: 100 Hz - yoga masters operate at this level.
5. Improve emotional issues: 11 Hz, 17 Hz, 53 Hz, 55 Hz, and 71 Hz.
6. Acute pain relief: 7 Hz, 70, Hz, 85 Hz, 90 Hz, and 174 Hz.
7. Chronic pain: 5 Hz, 26 Hz, 79 Hz, 80 Hz, and 82 Hz.
8. Meditative state: 10 Hz.
9. Healing DNA: 528 Hz. Present in Chlorophyll - the most powerful healing pigment in biology.
10. 432 Hz: effective for Lyme disease, helps ease anxiety, bring down heart rate and blood pressure, and generally is good for healing. Also known as Verdi's A, was the music tuning standard prior to today's tuning of 440 Hz.
11. 400 - 480 Hz: Destroys cancer cells (444 Hz also kills cancer cells)
12. 111 - 112 Hz sweep: Tx 40 minutes a day for 5 days; brain starts to produce neurotransmitters; 3 to 5 days goes to normal and totally restores short term memory. Cures alcohol and drug addictions.
13. Ameliorating emotional issues
  - a. 396 Hz – turn grief into joy
  - b. 639 Hz – reconnecting relationships
  - c. 852 Hz – return to spiritual order
  - d. 963 Hz – awaken perfect state

Focus on the 9 Solfeggio tones for the best healing results.

The original Solfeggio scale has 6 tones: 396, 417, 528, 639, 741 & 852. The 3 additional tones (174, 285, 936) hold an infinite array of healing properties.

14. As frequency increased, tooth movement increased with 120 Hz producing the greatest magnitude of tooth movement, statistically significant compared to both control and 30 Hz subjects.

**Note:** Biophysical characterization of low-frequency ultrasound interaction with dental pulp stem cells: data suggest that ultrasound can be harnessed to propagate to the dental pulp region where it can interact with the living cells to promote dentine repair. A frequency of 45 kHz with intensity settings of 10, 25 and 75 mW/cm<sup>2</sup> for 5 min. J Therapy Ultrasound.

Testing for the correct frequency: One can use applied kinesiology; pendulum, Dr. Omura's "O" ring test, or cranial rhythm. Just don't treat without verifying the appropriate frequency.
