

Dr. Smith Live

Energy Medicine: The New Frontier

June 11, 2026

**Topic: Discover an All Natural Supplement to
combat Micro Plastics**

- Why polarity is important in a detox formula.
- Why a broad spectrum detox formula is important.
- Why it's important to stay alkaline.
- Q & A

With co-host

Patricia Sihlanick

Time: 07:00 PM Eastern Time (US and Canada)

Register in advance for this meeting:

**After registering, you will receive a confirmation email
containing information about joining the meeting.**

Toxins poison our air, water, food and our bodies. We live in a virtual "sea of pollutants", carrying many toxins and heavy metals inside us. As many as 25% of Americans are estimated to suffer from some degree of heavy metal poisoning, particularly from mercury, lead, cadmium, and arsenic. According to the EPA, 70,000 chemicals are used commercially in the US, 65,000 of which are potentially hazardous to our health. The Environmental Defense Council reports that more than four billion pounds of toxic chemicals are released into the environment each year, including 72 million pounds of known carcinogens. These synthetic chemicals and heavy metals can be found even in unborn children, being passed on by the mother through the placenta.

Zeolite is a complex mineral which forms when volcanic lava contacts cold sea water. Its structure, primarily made of aluminum and silicon, has been likened to a "molecular sieve." This process can take thousands or even millions of years; scientists estimate that the first zeolite minerals formed over 300 million years ago.

Zeolites are a group of minerals with a four-sided honeycomb structure and, rare among minerals, a negative magnetic charge. The effect of the structure and the magnetic charge is that zeolite draws heavy metals (including mercury, cadmium, lead, arsenic, aluminum, tin, excess iron, and even radioactive metals like cesium and strontium-90) and toxins to it and simply engulfs them. The toxins "check in" and they can't "check out." Then the zeolite carries them safely and harmlessly out of the body in 5 to 7 hours through normal elimination process.

Thanks to these potent detox properties, zeolite can:

- Reverse oxidative damage
- Maintain a healthy microbiome
- Kill bacteria and viruses
- Boost the levels of minerals and trace elements
- Repair skin lesions and stop bleeding

The Ultra Liquid Zeolite boosted [glutathione](#) levels and protected lipids from oxidative damage.

Liver Protection

The antioxidant power of zeolite may be crucial for liver protection.

In a cell study, clinoptilolite reversed the liver-damaging effects of adriamycin, an anticancer drug. It suppressed inflammatory proteins and prevented cell death .

Zeolite Side Effects

In clinical trials, zeolite caused no significant side effects.

Ultra Liquid Zeolite Safely binds and removes toxic heavy metals.

The most affordable, reliable and easy to take toxin absorbing supplement.

The Ultra Liquid Zeolite metal detox treatment helps safely bind and remove toxic heavy metals (including mercury, pesticides, herbicides, volatile organic compounds, radioactive elements and others) without removing beneficial minerals. This may boost your

immunity. To defend against a broad range of bacterial/viral/fungal infections and chronic conditions.

Extremely safe and is completely eliminated from your body **within 5 to 7 hours**. So safe that it's on the the US Government's list of GRAS (generally regarded as safe).

Zeolite is the detoxifier that does not cause flu-like cleansing reactions.

The Ultra Liquid Zeolite zeolite is composed 100% of the zeolite type called "clinoptilolite" that has generated amazing results in laboratory testing. Almost 600 studies conducted over the last 50 years have investigated its effectiveness and safety. Clinoptilolite is the subtype of zeolite that has generated positive results in laboratory testing. Our clinoptilolite comes from the only ore supply that has been approved as safe for consumption by humans. In addition, it has been processed in such a way that it does not draw necessary minerals or elements from the body, instead it helps to remineralize the cells.

The clinoptilolite zeolites are a group of minerals with a four-sided honeycomb structure and, rare among minerals, a negative magnetic charge. The effect of the structure and the magnetic charge is that zeolite draws heavy metals (including mercury, cadmium, lead, arsenic, aluminum, tin, excess iron, and even radioactive metals like cesium and strontium-90) and toxins to it and simply engulfs them. The toxins "check in" and they can't "check out." Then the zeolite carries them safely and harmlessly out of the body through normal elimination pathways.

It is chemical free

Our zeolite is processed without chemicals. Through a natural, proprietary process, concentrated organic humic acid molecules have "naturally digested" the zeolite, holding it in permanent suspension.

It is bio-available

No solvents or heat-treatment methods are used in our proprietary manufacturing process. Because the humic acid in Liquid Zeolite is in organic, inter dimensional form, and because the zeolite is actually suspended in the humic molecules, 100% of Liquid Zeolite is carried into the cells yielding maximum bioavailability.

It has anti-aging properties

Because Liquid Zeolite uses high-grade humic acid to carry the zeolite to your cells, the anti-aging properties of organic humic acid are in play. There is no substitute for organic humic acid to revitalize your cells and reverse cellular degeneration.

What makes natural Liquid Zeolite with Humic Acid better than other types of liquid zeolite?

Other brands use chemicals and solvents or heat treatment methods to process their zeolite into a liquid form. We utilize the advanced manufacturing process of using humic acid (a highly regarded organic medium) which enables the zeolite to penetrate cell walls.

Zeolite is a safe natural detoxifier, it removes heavy metals such as mercury, lead, cadmium, and many other toxic chemicals from the body.

Zeolite Enhanced with DHQ (Dihydroquercetin) helps the body maintain optimum pH levels. It helps support strong immune system and reduces toxic overload by removing toxins, chemicals and heavy metals.

Heavy metals are implicated as a causative factor in many illnesses, especially of the inflammatory type.

Anti-oxidant: form of quercetin better utilized by the body with humic/fulvic as the carrier to the cell

Dihydroquercetin (DHQ), also known as taxifolin, is a bioflavonoid similar in structure to that of quercetin. The DHQ is usually extracted from Siberian Larch tree. Almost 600 studies conducted over the last 50 years have investigated its effectiveness and safety.

Flavonoids perform two important functions: they strengthen your body's immune response to attacks from viruses, allergens, and carcinogens and they act as powerful super-antioxidants, protecting your body against free-radical damage, and oxidative stress that can lead to many neurological, cardiovascular, and metabolic diseases.

Liquid Zeolite helps your body maintain optimum alkalinity, proper normalized pH levels and helps supercharge your immune system. It strengthens your immune system and reduces toxic load by removing toxins, chemicals & heavy metals. It helps to reduce signs of aging, improve your skin texture making it look smoother and younger.

The energy enhanced structured Living Water further enhances absorption as well as hydration. Living Water has the ability to remove disease markers, and makes pesticides, herbicides,

chemicals, toxins, heavy metals and even drug residues non-detectable!

Studies have shown that highly energized foods and supplements can be very beneficial. The liquid zeolite undergoes a special proprietary high-vibration energy enhancement process to make it work FASTER than other zeolite products.

The zeolite mineral molecule is digested by the humic mineral complex without chemicals or solvents, producing a highly stable and suspended potent bioavailable cell-penetrating supplement. Combining zeolite with humic acid delivers a powerful natural chelating, pH balancing, immune supporting and remineralizing supplement.
